Q-exhibition Success at 100% Design

September has seen our first visit to 100% Design; four frenzied days at the largest branch of the London Design Festival. This was the platform to launch our new innovations, including the exclusive Easy Glass Evolution system from which we received remarkable feedback from our customers. This event was a tremendous opportunity to meet existing customers and put names to faces that have become familiar to us. It was also good to meet such a range of new clients, from Specifiers and Architects to the man on site. Of course there was coffee and danish's for all!

Welcome!

Since the last newsletter our team have been very busy with the recent 100% Design Exhibition. It has been a pleasure to meet so many of you face to face. Coming soon is Interbuild at the Birmingham NEC where we will be showing off even more of our exciting new products from the latest catalogue update. We hope this will help you realise your projects with even more ease.

Martyn Eveleigh
Sales Manager

We would like to give a big thanks to everyone who made it down to the exhibition to visit us.

Fresh ideas. Easy Instalation. Competitive Prices.

Missed Us ? More new products at Interbuild!

- Even more of our brand new products on show
- A chance to meet our team
- Friendly advice
- Real life situations from Q-members

Simple Solutions, Sophisticated Style

Throughout the past months our International team have been working hard to provide a whole series of brand new products, each designed to help you realise your projects with style and sophistication.

Our new catalogue update is filled with more expanded product ranges that are more adaptable and easier to install as well as more fitting when working on a budget.

Order our free catalogue update today and all your railing needs will soon be delivered to your doorstep.

Q-new Catalogue Update

Flexible Fabrications

At Q-railing we know that realising projects in the real world isn't always straight forward. Wonky walls and hard to reach places can make simple constructions a real challenge. In response we have come up with solutions to help make installation for efficient.

The **0556 Flexible Bracket** is designed in two adjustable sections that fit securely together allowing perfectly upright posts to be attached to uneven surfaces with ease. This means each post can then be individually adapted to suit the facade.

Perhaps even more exciting is the **Glass Adapter 0760**, which includes the exclusive Q-bubble, an integrated spirit level that is cleverly concealed into an aesthetic product, well suited for placement into awkward locations. At the forefront of design and innovation this latest solution will reduce the need for using fiddly tools in difficult installation sites.

for you!

Ready-made Realities

When time is of the essence it is great to have a product all ready to install. The **Q-railin'go** is our first pre-assembled handrail designed to be put straight up on the wall. These effortless wooden and stainless steel rails come in two different lengths 1.25m and 2m and are ready prepared with all accessories you need to use right in the box. The competitive prices and time saved provide an effective solution that couldn't be more straightforward. With three modern designs to choose from, beech, round and square line stainless steel, it just makes sense.

Even Easier, Easy Glass Evolution

After the undoubted success of the award winning **Easy Glass** system the latest **Easy Glass Evolution** is Q-railings unique innovation that has made glass balustrade construction even simpler. A patented spacer design means that the glass can be quickly fitted without worrying about constant measurements or movement. Now the sleek, lighter design is more efficient to install, with a new drainage channel that makes it more effective for outdoor use.

So what does this all add up to? More effective installation especially in unusual places, saving on labour time and costs for both you and your clients.
