Q-trade counter In New castle-under-Lyme

Q-railing now provides direct deliveries with 24 hour order processing to customers in mainland UK. Our Q-trade counter in Newcastle-under-Lyme is a combined showroom, warehouse and logistics centre for distributing and processing orders.

The Q-trade counter is open weekdays from 7.30 am to 5 pm. For your convenience, please place your order first for collection upon arrival, and to confirm stock availability.

Welcome!

Welcome to the first Q-newsletter! 2009 has been an exciting year for us. We have introduced 195 new products and opened the Q-trade counter, and now stock 80% of our range in the UK. We are also exhibiting at Interbuild and 100% Design, and look forward to meeting you and showing you how Q-railing can help your next project be a success!

John Whitehead
Operations Manager

What's new?

NEC - BIRMINGHAM

18th- 21st October, hall 05, stand C22-D31

High Quality in Stainless Steel

Q-railing provides much of its products in stainless steel. That is not only a beautiful but also a high-quality material. At least, when it satisfies to the quality norms that Q-railing guarantees to their customers.

Stainless steel 304

This grade of stainless steel is a composite of iron and chromium. When placed outdoors, the chromium rises to the material's surface and oxidizes to form a protective shield known as a passive surface.

Stainless steel 316

Through the addition of molybdenum, grade 316 provides superior corrosion resistance for outdoor use.

The exact composition of the individual components is essential for producing 304 and 316 in excellent quality. Q-railing carefully examines all of its materials using a spectroanalysis machine to guarantee consistent quality of all its stainless steel products.
